

Climate Protection Leadership Group

October 18, 2007, 7:30 to 10:30 AM

Community Bank of the Bay

1750 Broadway, Oakland, California

Fee - \$40.00

Climate change issues are here to stay, requiring focus on greenhouse gas emissions, carbon footprints, cap and trade mechanisms, and carbon offsets. What you need is a reliable source of information - not in a single seminar or briefing, but an ongoing stream of information, keeping you updated on the best practices and innovations as well as the regulatory developments:

- ✍ What is the ARB doing now and what are they likely to do soon?
- ✍ Will emission reductions be mandatory or voluntary?
- ✍ What about our local air district? How will the BAAQMD-JPC Climate Protection Initiative affect me?
- ✍ Should I inventory now or wait until the ARB issues guidelines?

Beyond Compliance, LLC is convening a group of committed and responsible environmental professionals and companies to share information on climate protection strategies: legislative and regulatory developments, progress reports on ARB and the AB32 developments, analysis of the impacts of these requirements on operations, information on new technologies, review of GHG chemistry, case studies and successful reduction strategies. Once a quarter, this Climate Protection Leadership Group (CPLG) will meet for a three hour workshop, with programs arranged by the CPLG Partners:

- ✍ Gary Lucks, JD, Principal of Beyond Compliance and Co-Founder of Sustainable Earth Initiative, co-author of *Guide to California Environmental Law* and *California Environmental Auditing*,
- ✍ Jon Elliott, JD, President of Touchstone Environmental, environmental attorney and author of the *Hazardous Materials Program Matrix* and a dozen books on compliance and liability management, and
- ✍ Susan Sakaki, Principal of EnviroSystems Group and Co-Founder of Sustainable Earth Initiative.

In addition to the networking and mutual problem solving opportunities of the quarterly meetings, CPLG members will receive quarterly electronic newsletters. Membership (12 months) is open to both public and private sector organizations and individuals.

Special Guest: Dan Skopec

President of Climate & Energy Consulting
and former Undersecretary of Cal EPA, who played
key roles in AB 32 and the Climate Action Team 2006 report.

**To reserve your space at the workshop, contact Barbara Baer
(barbara@beyondcompliance.net) at Beyond Compliance, 510-268-9210.**
